

César Flores Castro

Graphic Designer

I'm **César Flores**, a **graphic and UI/UX designer** with over 10 years of experience creating visual stories that connect and inspire. I specialize in user experience design, branding, and web design, blending creativity with strategy to deliver impactful digital experiences.

I lead visual design projects from research to implementation, developing user personas, mapping user journeys, and defining interaction flows. Alongside design, I explore artificial intelligence—from generating images with MidJourney and Stable Diffusion to experimenting with LLMs like ChatGPT and Qwen. This passion allows me to merge design and technology, bringing ideas to life through innovative, future-ready solutions.
